Intro

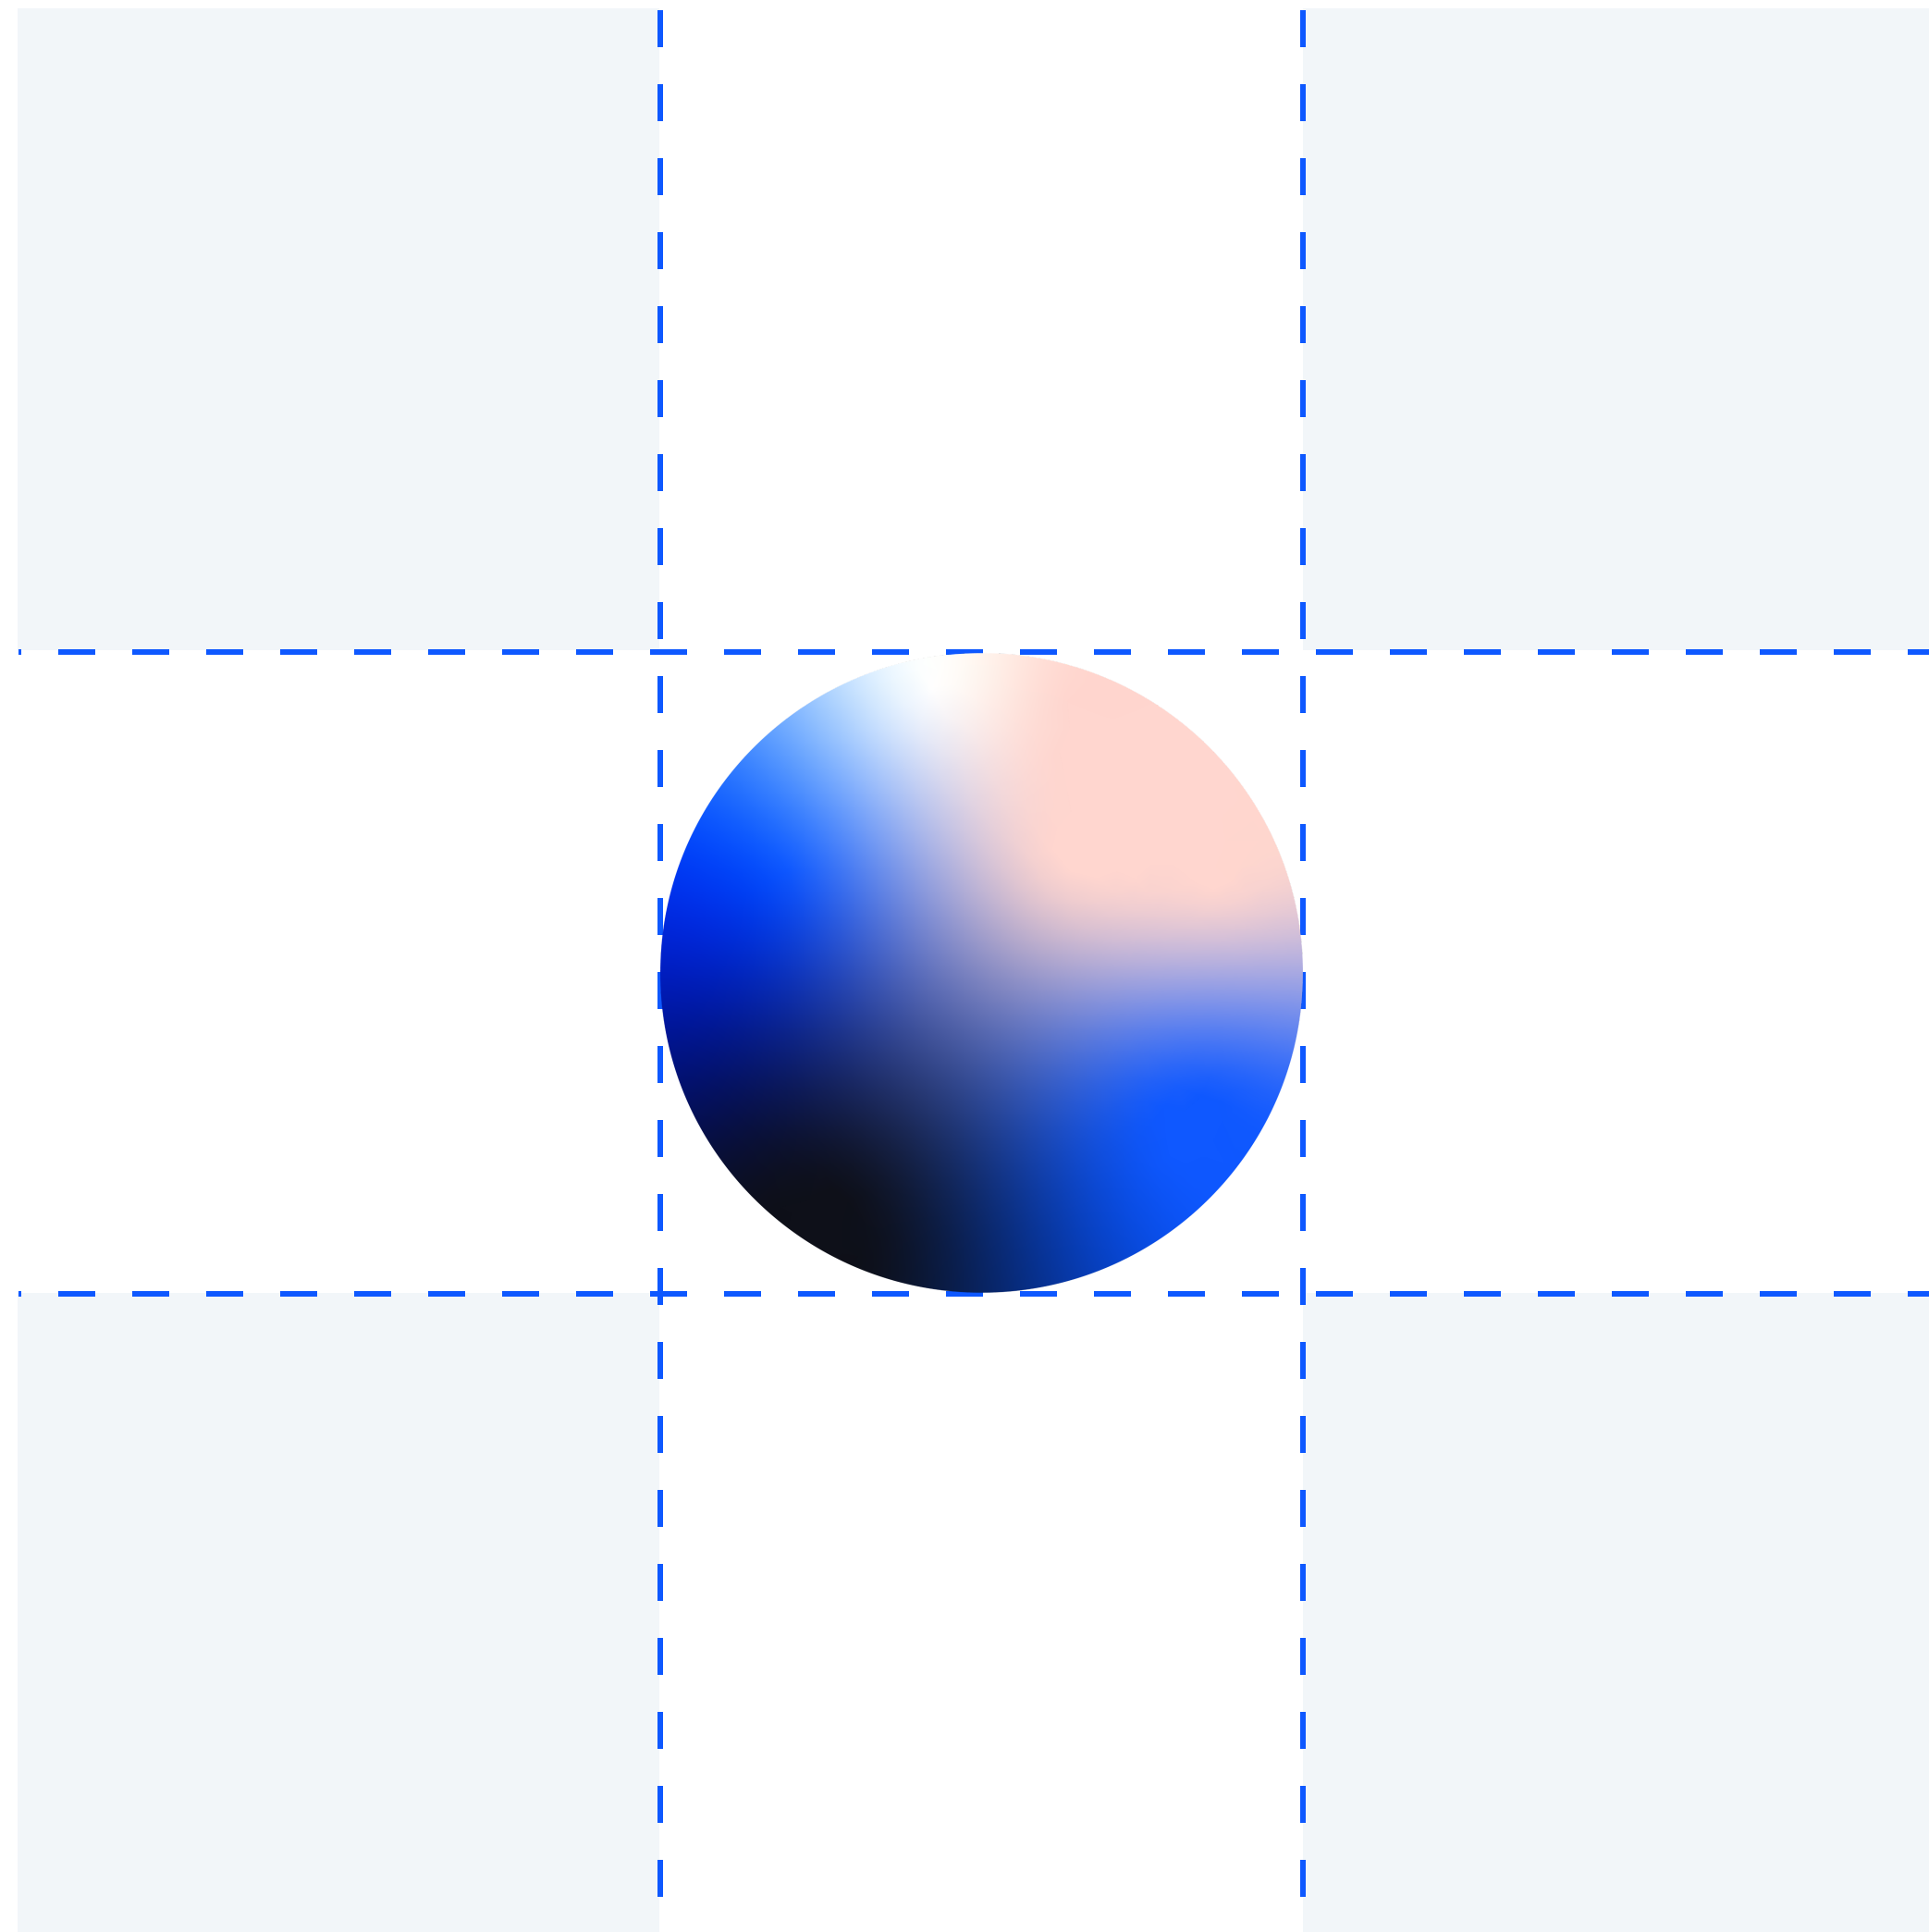

Welcome to Atlas’ brand guidelines

This document serves as a foundational cornerstone in defining and maintaining the visual and experiential essence of our brand. Herein, you will discover a detailed framework and set of principles that govern how we present ourselves to the world.

At Atlas, we recognize the significance of a consistent and cohesive brand presence. This document is designed to ensure that every interaction, be it through our digital platforms, marketing materials, or physical touchpoints, reflects a unified and unmistakable brand identity.

Symbol

The background of the symbol

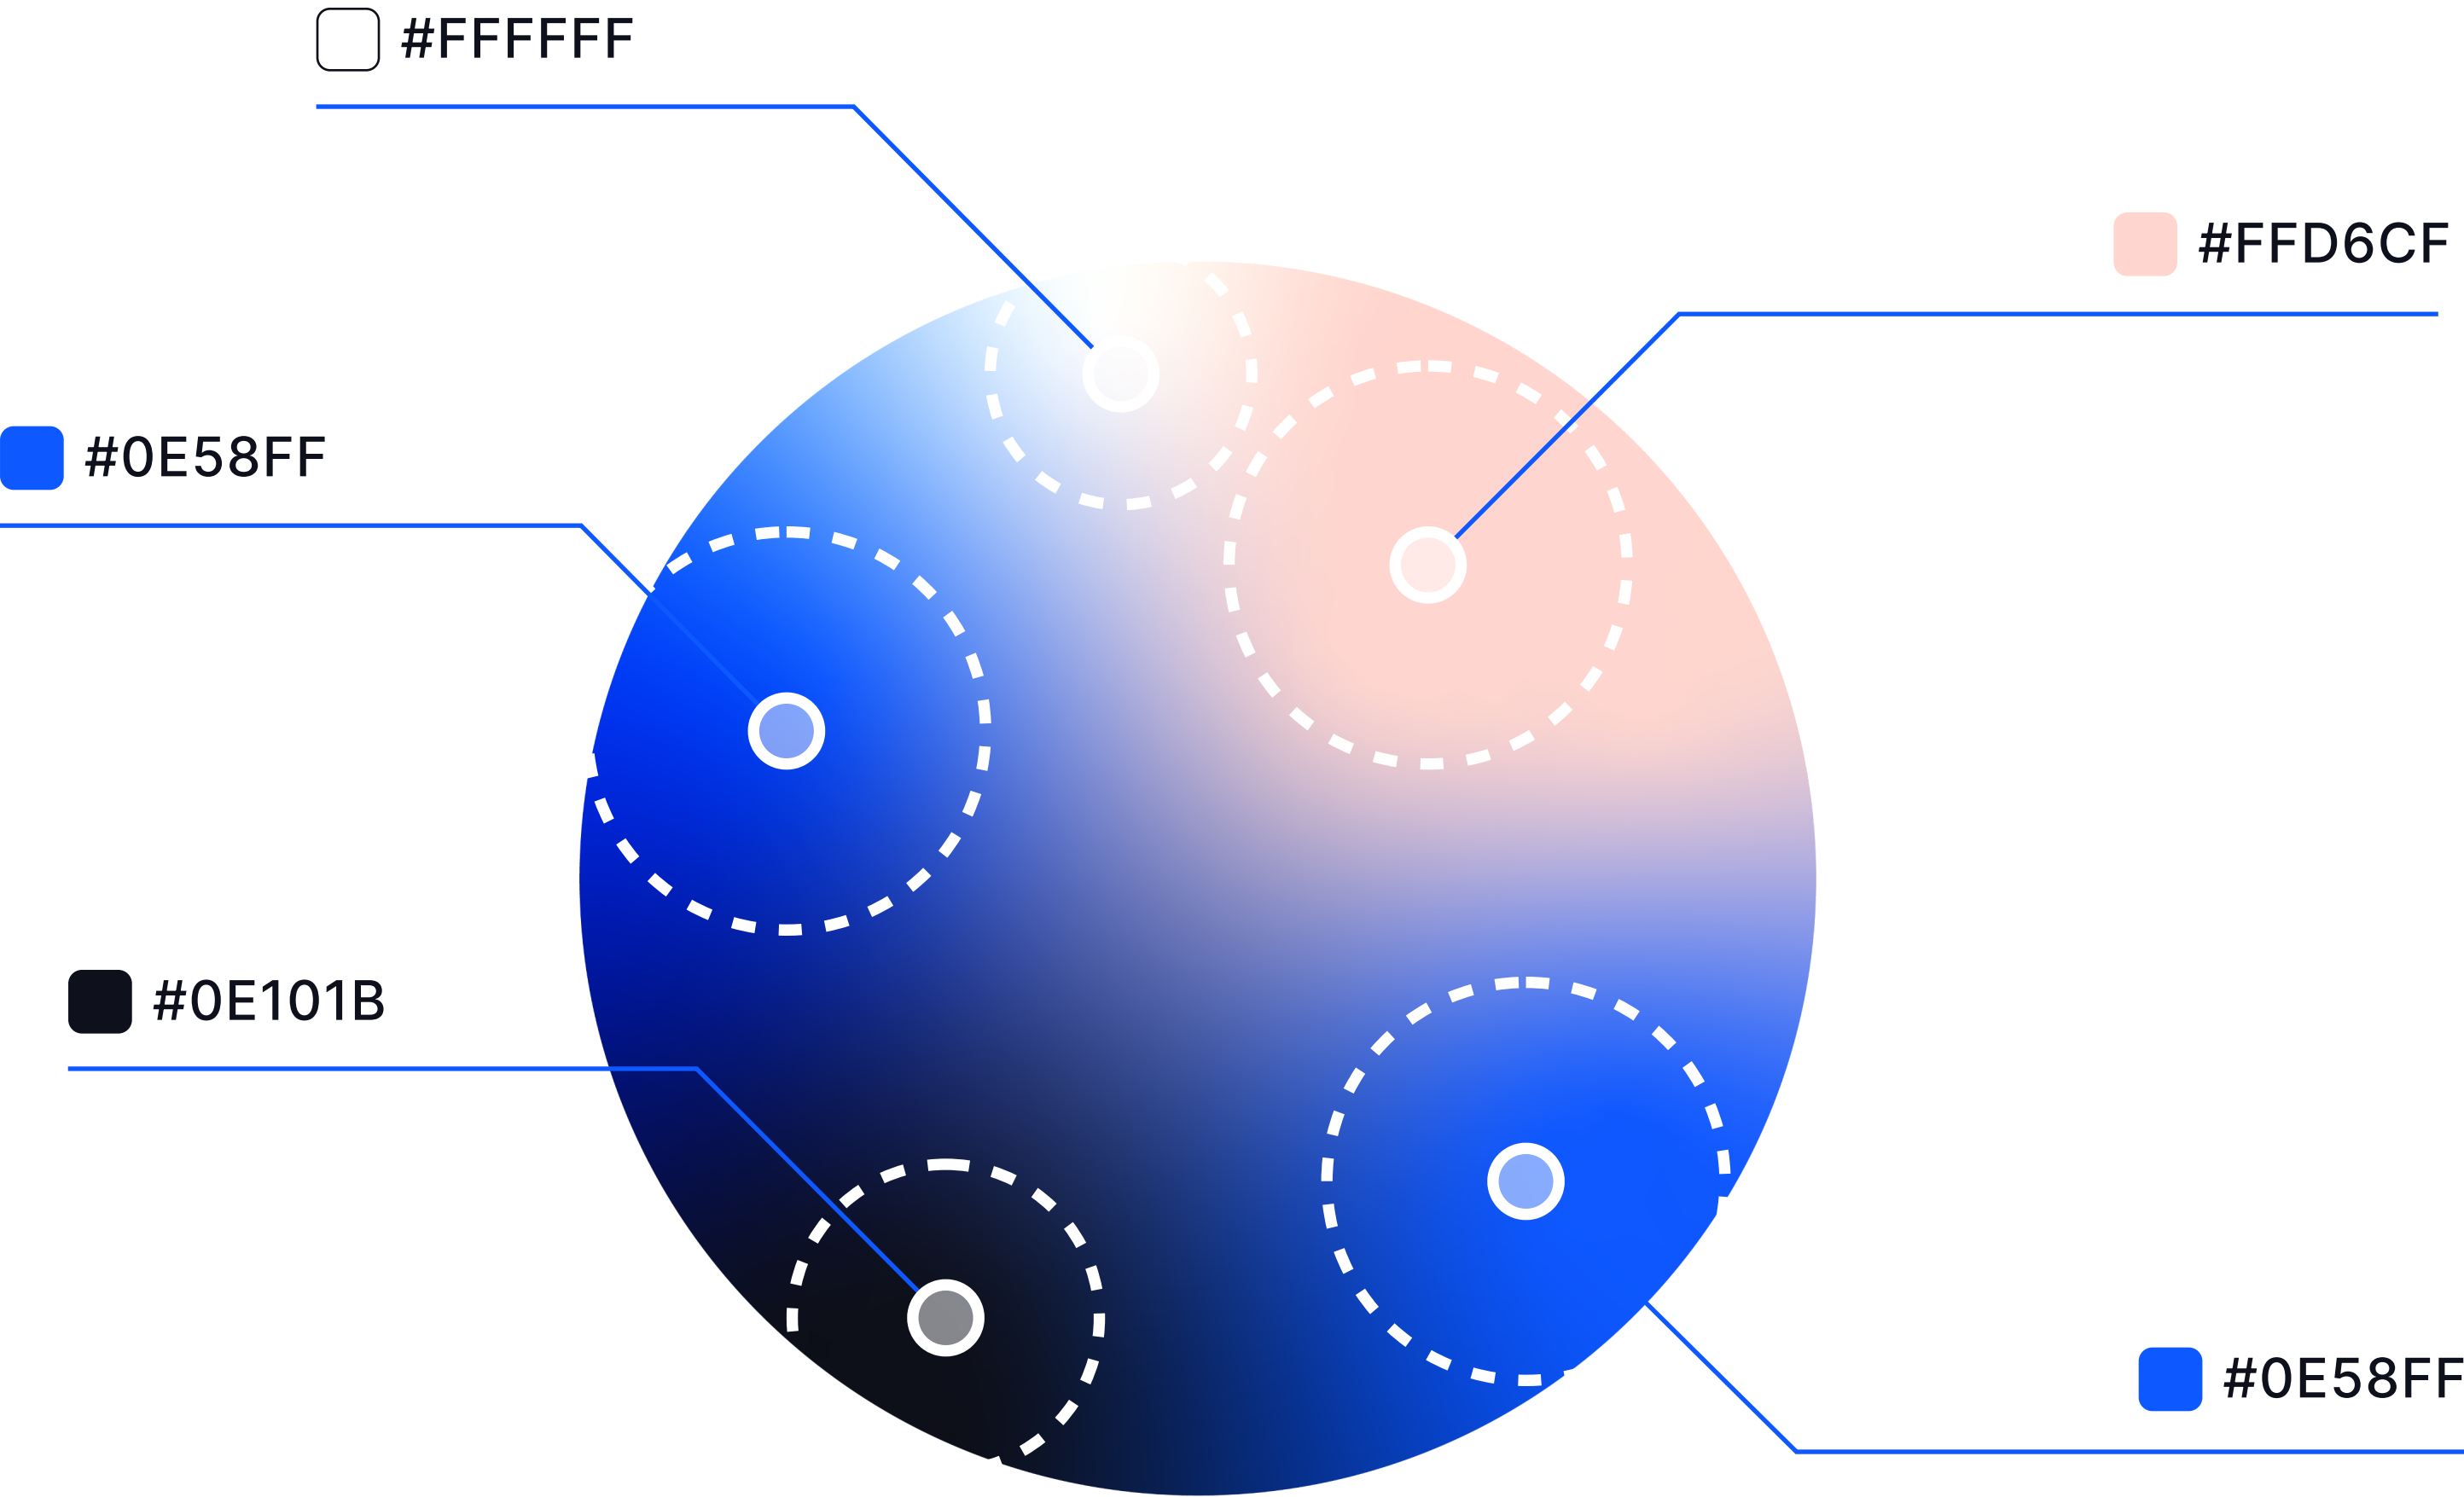

A globe is the **most universally** recognized symbol representing the Earth and geographical aspects.

As a GIS software operates with geospatial data, the globe symbol instantly communicates the core purpose and function of the software - working with geographical information, mapping, and spatial analysis.

Say goodbye to static maps

The gradient colors symbolize dynamic data representation. As the software working with maps and geographical data historically has remained relatively static, Atlas is the symbol of a new approach to make maps.

Atlas transform maps from a static environment to a dynamic and evolving world.

Logo

Full logotype - black

Full logotype - white

Always add margins to all sides of the Atlas logo

Grid-based white space

How not to use our logo

Reference the examples below for more detail on prohibited changes

Do not paint the logo in any color

Do not paint the color of the circle

Do not use the logo symbol only

Colors

Main colors

Our main palette uses bright colors to bring a boldness to our brand, and is used in logical ways throughout product and marketing to guide the eye and highlight the important stuff.

Gradient backgrounds

Our color palette is constructed from strong colors, supporting colors, light gradients and bright markers. A combination of layers radiates harmony and makes a bold statement.

Color combinations

Color combinations play a pivotal role in defining the visual identity of our brand, conveying its personality, values, and creating a memorable and cohesive brand experience

Square dot grid, 4px x 4px, 50 dots per row, margin 5px

Dot grid patterns

The use of a light gradient background along with a dot grid offers versatility in design. It provides a subtle backdrop that complements various brand elements while maintaining a clean and adaptable aesthetic that can work across different platforms and mediums.
